Simpson Strong-Tie Receives First Evaluation Report from IAPMO ES

Ontario, Calif. (Aug. 7, 2008) — IAPMO ES, a trusted name in the evaluation of building products, materials and designs, completed an evaluation report for several wood-to-wood connector products on behalf of Simpson Strong-Tie, an industry leader in the manufacture of structural building components.

The report includes evaluations of both long established Simpson Strong-Tie products and newer entries to the marketplace, including several angle, clip and tie connectors used to attach structural wood members. These connectors are core products of the Simpson Strong-Tie brand and are used nationwide by design engineers, builders and contractors.

“The technical review provided by IAPMO ES was very thorough and Simpson Strong-Tie is pleased to see that IAPMO ES is applying a quality detailed review,” said Jeremy Gilstrap, manager of Engineering R&D for Simpson Strong-Tie. “The comments were sound and applicable to the product being evaluated.”

A leader in structural systems research and technology, Simpson Strong-Tie is one of the largest suppliers of structural building products in the world.

“Our work on behalf of Simpson Strong-Tie illustrate the trust industry leaders have placed in IAPMO ES to perform thorough building product reviews in a timely manner,” said Amir Zamanian, director of IAPMO ES. “Manufacturers now have a choice for their evaluation reports, and they’re increasingly choosing IAPMO ES.”

ABOUT IAPMO ES

IAPMO ES is ANSI accredited to provide building product evaluations to the building codes and offers both the required speed and credibility for a product’s aggressive introduction to the marketplace. Manufacturers enjoy the benefits of the fast turnaround and viability of an IAPMO ES evaluation report and building officials recognize the inherent quality and accountability IAPMO ES brings to all of its work.
